MAILED 14 JAN 30 1976
EXHIBIT NO. 463 A 2 Feb. 12/76
Inuvik N.W.T.
Commission
Counsel

Dear Gaile:

Pursuant to your telexes of January 22 and 23rd, I am pleased to enclose statistical material related to our Social Assistance program.

As you will see, the material enclosed is not precisely that which you requested. However, the summaries provided are nothing more than tabulations of the data from the computer printouts. I hope and trust that they provide sufficient detail for your purposes and that they may save you a few steps in preparing your material. The computer printouts you mention are available and can be photocopied if it is absolutely essential. We have not done this at this point because the printouts are batched and bound on a monthly basis and extracting individual reports for photocopying would be an extremely lengthy and demoralizing chore! This is further complicated by the fact that the report you are interested in is not kept on a cumulative basis hence to provide you 36 months of data for 15 communities raises obvious problems.

We have managed to provide reports on the Inuvik Region as far back as 1969. I know that statistics are available before that time but we have not as yet been able to locate them. It is possible that this material was misplaced in the shuffle of responsibilities between Ottawa and Yellowknife which took place at that time. We are continuing to investigate this and will keep you advised. Unfortunately, Jean Marie River and Trout Lake statistics cannot be located for the period before 1972.

You should be extremely cautious in the inferences that are drawn from these statistics. I believe that it was Benjamin Disraeli who said "There are lies, dam lies and

Digitized by the Internet Archive
in 2025 with funding from
University of Toronto

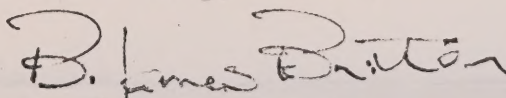

statistics". It would be impossible for me to attribute the increases in costs and in cases to specific events such as you mention in question 4 of your first telex. Even the master edit report we receive which identifies the name of the recipient and some of the other variables on the "Application for Social Assistance" cannot tell us the precise circumstances of each applicant - only a generalized cause of need for example "Unemployed but able to Work". At the same time I fully expect that all of the conditions you describe in question 4 have happened at some time and are likely to happen again.

I am able to give you a few known factors which have led to an increase in the dollar expenditures. Upward revisions in grocery allowance rates were made in 1971 and 1975. We have enclosed copies of the food scales of the time for your comparison and you will note that in 1975 the increase was in the order of 37.5%. We cannot locate as yet the scales for the pre-1971 period, however, as my memory serves me the rates were \$30 monthly per adult and \$15 per child hence there was a considerable percentage increase at that time. In 1971 clothing rates were also raised substantially - between 50 and 100% depending on the age of the recipient.

In 1973 a major change was made in the manner of issuing social assistance. Regulation and administrative changes saw the issuing of cheques instead of vouchers, the inception of a more generous incentive scheme for low income persons and so forth. The net effect of these changes is difficult to determine but my opinion is that in time it led to a different attitude on the part of both the clientele and the worker administering assistance. Some of the change may have been attributable to this.

I trust that despite these difficulties this information may prove useful. Should you have further queries please advise me and I will do my best to respond.

Yours truly,

B. James Britton
Chief, Program Evaluation &
Development

Encl.
